ISCS is the new event launched in 2015 by the Control Division of the Society of Instrument and Control Engineers (SICE) for providing an opportunity of international interactions among researchers, students, and engineers who are working on various aspects of control systems, from theory to application. The topics of interest include, but are not limited to:

Linear Systems; Nonlinear Systems; Hybrid Systems; Robust Control; Optimal Control; Model Predictive Control; Networked Control Systems; Adaptive Control; Intelligent Control; Computational Methods; Modeling, System Identification and Estimation; Process Control; Mechanical Systems Control; Automotive Control; Guidance and Flight Control; Control Applications.

The *regular papers* presented in ISCS 2021 will be included in IEEE Xplore. Find below the information for submission:

Paper Submission

All of the papers for both of initial and final submissions must be in English. Two categories of contributed papers are provided for authors:

Regular paper: Full contributed paper of a completed work.

Position paper: Extended abstract of a timely review of research, a case study, a technical discussion, etc.

The papers will be peer-reviewed. The accepted papers will be assigned to oral sessions in English.
